Experts know that the coronavirus and climate change are real, but Donald Trump calls them

A 'HOAX.'

Learn more and get involved:
www.TrumpPollutionRecord.com

Trump called both climate change and coronavirus a “hoax,”^{1,2} and has refused to listen to the scientists and experts when it comes to our health and safety. He didn't believe them on coronavirus and he doesn't believe them about global warming. But these global crises are no hoax.

Trump's climate change denials risk our health and economy. Refusing to listen to science means Americans are feeling the disastrous consequences of coronavirus now and will see the damage from climate change – like unsafe drinking water and increasingly dangerous hurricanes – for generations.³

Trump chooses to blindly believe corporate polluters, not scientific experts.⁴ Despite EPA evidence, and to appease industry insiders, Donald Trump relaxed rules for storing coal ash and opposed classifying so-called “forever chemicals” as hazardous. The poisons created by both are found in our drinking water...and also in North Carolinians, placing us at risk for cancer, heart disease, and neurological damage.

Check the facts: 1. *Politifact*: “Yes, Donald Trump Did Call Climate Change A Chinese Hoax.” 6/03/16
